**To whom it may concern**

M. Nicolas Rechatin is currently a 4<sup>th</sup> year student at ESTACA, he has chosen Aeronautics as Industrial Sector.

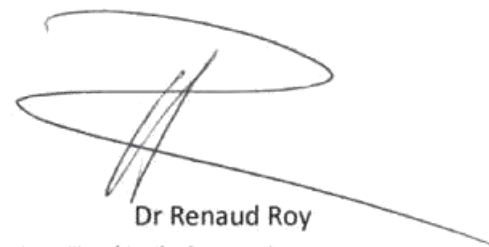

I have known Nicolas since September 2012 : I have been his academic supervisor this year. Throughout this year, I have been impressed by his ability to understand deeply and perfectly very complex scientific subjects which allowed him to acquire strong technical skills.

During his studies, I was able to witness his capacity to manage at the same time his studies and its investment in student projects. I also have appreciated his academic level, his initiative and he proved me that he is methodical, both able to work independently and perfectly at ease inside a team.

I am convinced that he will succeed this year as he did before, with excellent results and I have no doubt concerning his motivation and his level of English.

Nicolas would like to have a professional career in the field of aeronautics and is really interested in those subjects like his previous internship demonstrated. He has an excellent interpersonal relationship skills and is able to adapt himself very quickly, as he did at ESTACA : I am sure that it will be the same during his internship.

For all these reasons, I **strongly recommend** his application.
